

Attends® Deoplus

Attends insert pads are a range of rectangular pads which can be used with a washable pouch pant or as a booster pad for additional absorbency or faecal smearing.

Deoplus Insert

- 1** Nonwoven back sheet allows the urine to pass through into the core of the primary pad if the product is used as a booster pad.
- 2** Deoplus insert has a superabsorbent core for improved leakage protection, skin dryness and odour protection.

Additional Information:

- 3** There are three products in the range to better meet user needs.
- 4** Coldex insert and Coldex Endless have a fluff core with no superabsorbents and allows urine to pass through the core quickly into the primary pad.
- 5** Coldex Endless is a continual roll of 30 pads which can be cut to size to better meet individual needs.

Natural Odour Protection

(Deoplus Only)

Natural Odour Protection reduces the risk of unpleasant smells.
